

ESR positions available within the Marie Skłodowska-Curie ITN-EJD programme

Four European Universities (Politecnico di Milano-Italy, Technische Universität Darmstadt-Germany, Centrale Supélec-France and Université Libre de Bruxelles-Belgium), offer 15 positions for a three-year PhD programme in Combustion for Low Emission Applications of Natural gas (CLEAN-Gas).

The project aims at developing new experimental and numerical tools to improve natural gas combustion in innovative burners. It is a unique opportunity to enhance your research skills within a motivating and inspiring environment.

Gross annual salary plus benefits amount to about € 45000.
